

Automation & Robotics (Irl)

www.automation-robotics.com

Your Local systems integrator

This flyer is for the purposes of introducing you to the world of robotics. A recently registered trading name of Pak Automation ltd (Automation And Robotics Irl) will serve to enable us to focus through a division of our company in being systems integrators for the two Robot partners mentioned below.

The Toshiba fast and accurate 4 axis Scara robots provide an economic solution for applications up to 20Kg. The Toshiba robots are ideally suited for automatic assembly, machine loading, palletising, adhesive operations, pick and place and end of line packaging.

SR65 4HSP

Kawasaki Robot

The Kawasaki range of robots provides multi-axis capability with payloads from 5Kg to 200Kg for process and handling applications. The Kawasaki robots are ideally suited for handling palletising, welding, painting, fettling, seam sealing and other process applications.

We would welcome an opportunity to meet and discuss your particular application
